

Appendix 4

Probability of Ungulate Use per UCUT Study Site

The probability of ungulate use is on the y-axis with site prep treatment on the x-axis. The Kalipsel Indian Creek (KAL_IC) site had the highest visitation. The Lynx Creek (CCT_Lynx) site's control camera either was not triggered or malfunctioned during camera periods.

Sample of game camera photos:

Broadcast burn site prep

Mechanical site prep

Herbicide site prep

Control site prep
