

# Biological Resilience for Indigenous Systems Empowerment

an NSF-RaMP Project

*Tribal Nation Building through a one-year traineeship with experts across fields and across Nations.*

*BioRISE will interweave Indigenous ways of knowing with western science approaches to solve local and global issues of biological resilience.*

*We seek motivated applicants who have completed only their Bachelor's Degree, for a paid, year-long research project working in the PNW.*

## Learning Units Will Include:

- *Nation Building and Tribal Sovereignty*
- *Indigenous Research Methods*
- *Intersections of Tribal, Federal, and Local Law*
- *Systems Thinking*
- *Quantitative Methods and Reasoning*
- *Analytical Tools and Resources*
- *Scientific Writing and Presentations*
- *Bridging to Graduate School and Career Options*
